

HAWBOLDT SKID MOUNT HYDRAULIC POWER UNITS

Designed. Built. Marine.

APPLICATIONS

- ▷ Local power supply of individual equipment
- ▷ Central power supply for whole ship-sets

Custom built to a wide variety of applications

DESIGN

- ▷ 25+ year service life
- ▷ Suitable for marine environments
- ▷ Cold weather operation
- ▷ Various sizes up to 500 hp

Designed for reliable service in harsh conditions. Our Hydraulic Power Units are up to the toughest challenges.

CUSTOM ENGINEERED

Hawboldt pulls from 100 years of marine experience to choose the ideal HPU for your marine application. Hawboldt produces hydraulic power units ranging from 25 to 500 HP for general marine use and for oceanographic applications including LARS and ROV recovery systems.

STANDARD FEATURES

- ▷ Marine coating system
- ▷ Stainless steel reservoir and hardware
- ▷ Immersion heater for operation down to -20 °C
- ▷ 3 phase, 460 VAC, 60 Hz power
- ▷ NEMA 4X paneled starter
- ▷ Crash frame with integrated DNV lifting lugs and drip tray
- ▷ Return filter
- ▷ Pressure, temperature, and level gauges

OPTIONS

- ▷ Dual, redundant pump-sets
- ▷ Air or water cooling
- ▷ Hand-pump back-up
- ▷ Pressure compensated or load sense variable displacement pumps
- ▷ Sophisticated PLC based sensing and control system
- ▷ Arctic package for operations down to -40 °C
